Regulatory Oversight Checklist:

Some research activity, by regulation or policy, requires additional approvals and oversight. If you indicate yes to any of the following questions, evidence of compliance with any additional oversight must be demonstrated prior to release of awarded funds.

- Y N Are human subjects involved?
- Y N Are experimental animals involved?
- Y N Will biohazards, recombinant DNA or/and radiation be used?
- Y N Does the project require access to the BSL-3 laboratory?
- Y N Does this project involve the use of controlled substances?
If yes, the faculty sponsor must acknowledge this element in their willingness to co-sponsor this activity and demonstrate they possess the appropriate licenses.
- Y N Are select agents or high consequence livestock pathogens and toxins involved?
- Y N Does this project/proposal involve collaboration with a foreign consultant, require identification of foreign nationals, include work being performed outside the US, include technical narrative references to military/defense articles, or contain provision that the research results be generally unavailable to the public (e.g., restrictions on publications)?
- Y N Is there potential for intellectual property or copyrightable information to be generated through this project?
- Y N Will program income be generated through the project?
-

Proposal Narrative:

- Please use separate pages, and type in 12 point font using **Arial**, **Courier New** or **Times new Roman**.
 - Narrative not to exceed ten (10) single spaced pages, including tables and charts.
 - Page limit does not apply to literature citations.
-

Please combine the signed application, faculty letter of support, research plan narrative and reference citations into a single PDF document.

Please refer to <http://www.uidaho.edu/research/stilling-trust/forest-science-research-fellowships> for complete instructions.
