FOOD RESEARCH CENTER TI

860 IDAHO AVE, MOSCOW, ID 83844

PROJECT NARRATIVE

APPROXIMATELY 1,934 SF REMODEL OF THE EXISTING NUTRITION ANALYTICS CORE LABORATORY LOCATED IN THE UNIVERSITY OF IDAHO FOOD RESEARCH CENTER. SCOPE OF WORK INCLUDES NEW FLOOR, CEILING, AND WALL FINISHES, AND MECHANICAL, PLUMBING, AND ELECTRICAL UPGRADES.

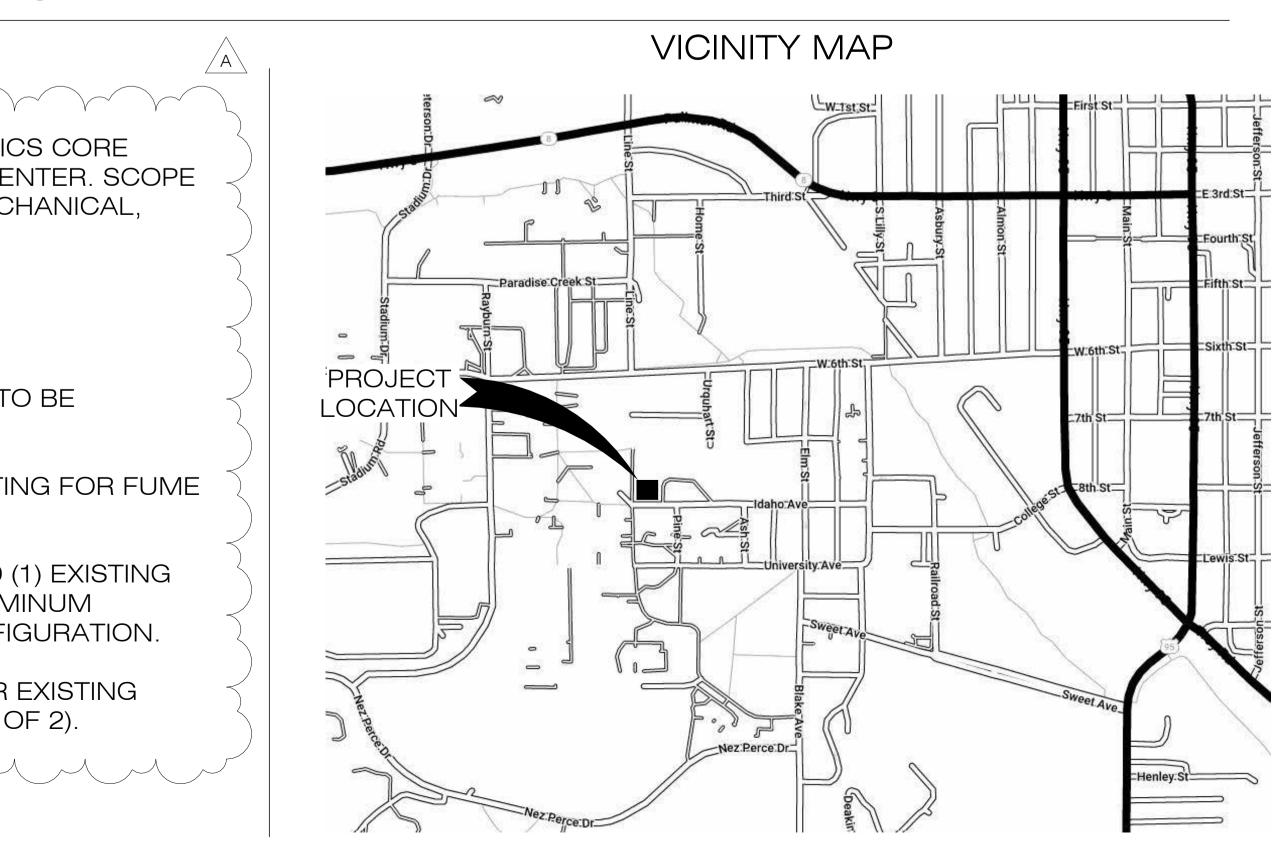

LIST OF ALTERNATES:

ALTERNATE NO. 1: ALL SCOPE OF WORK IN ROOMS 205, 205A, AND 205B TO BE ALTERNATE #1.

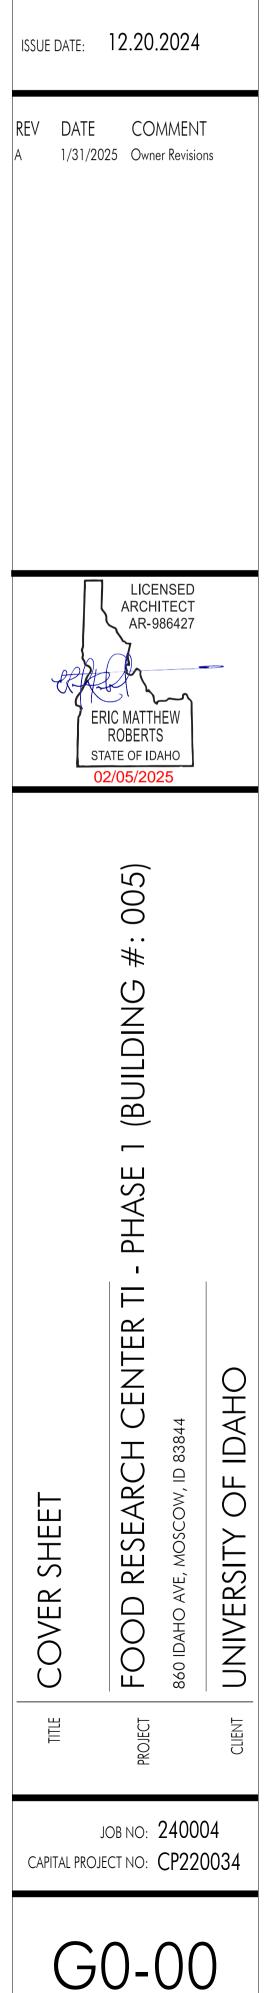

ALTERNATE NO. 2: FUME HOOD IN ROOM 207 TO BE ALTERNATE #2. DUCTING FOR FUME HOOD TO BE INCLUDED IN BASE BID.

ALTERNATE NO. 3: REMOVE (3) EXISTING WINDOWS FROM ROOM 207 AND (1) EXISTING WINDOW FROM ROOM 210B. REPLACE WITH NEW ALUMINUM STOREFRONT WINDOWS OF THE SAME SIZE AND CONFIGURATION.

ALTERNATE NO. 4: PROVIDE MANUALLY OPERATED WINDOW SHADES FOR EXISTING WINDOWS IN ROOMS 205 AND 205A (TOTAL QUANTITY OF 2).

PROJECT DESCRIPTION

THIS PROJECT MAKES NO CHANGES TO THE BUILDING OCCUPANCY TYPE, USE, OR CONSTRUCTION TYPE. THERE SHALL BE NO CHANGES TO ANY ELEMENTS AFFECTING LIFE SAFETY, EXITING/EGRESS, OR REQUIRED PLUMBING FIXTURES. EXTERIOR CHANGES INCLUDE REPLACING (5) EXISTING WINDOWS LIKE FOR LIKE.

THIS PROJECT INCLUDES AN INTERIOR REMODEL OF 2,130 GROSS SF, OR APPROXIMATELY 13.2% OF THE ROUGHLY 16,094 GROSS BUILDING. THE ARCHITECTURAL SCOPE OF WORK INCLUDES NEW INTERIOR FINISHES (CEILING TILE AND PAINT, WALL PAINT, AND FLOORING), NEW CASEWORK, REPLACEMENT OF (2) DOORS AND REMOVAL OF (1) DOOR. THE MPE SCOPE OF WORK INCLUDES A NEW ROOFTOP HVAC UNIT, NEW DUCTWORK, NEW LIGHT FIXTURES AND CONTROLS, AND REPLACEMENT OF EXISTING PLUMBING FIXTURES WITH NEW.

| | Provide solid core doors at each location |

Shop Drawings: Show doors and frames, elevations, sizes, types, swings, undercuts, beveling, blocking for hardware, factory machining, factory finishing, cutouts for glazing and other details.

Provide information as required by AWI/AWMAC/WI (AWS) or AWMAC/WI (NAAWS). Samples: Submit two samples of door veneer, 2 by 3 inches (50 by 76 mm) in size illustrating wood grain, stain color, and sheen.

Manufacturer's Installation Instructions: Indicate special installation instructions.

Warranty, executed in Owner's name.

DELIVERY, STORAGE, AND HANDLING

Package, deliver and store doors in accordance with specified quality standard.

Accept doors on site in manufacturer's packaging, and inspect for damage.

Protect doors with resilient packaging. Do not store in damp or wet areas; or in areas where sunlight might bleach veneer. Seal top and bottom edges if stored more than one week. Break seal on site to permit ventilation.

WARRANTY See Section 01 78 00 - Closeout Submittals for additional warranty requirements.

Interior Doors: Provide manufacturer's warranty for the life of the installation. Include coverage for delamination of veneer, warping beyond specified installation tolerances, defective materials, and telegraphing core construction.

Verify that opening sizes and tolerances are acceptable.

Use machine tools to cut or drill for hardware.

alignment.

INSTALLATION

TOLERANCES

ADJUSTING

END OF SECTION

Do not install doors in frame openings that are not plumb or are out-of-tolerance for size or

Install doors in accordance with manufacturer's instructions and specified quality standard.

Coordinate installation of doors with installation of frames and hardware.

Comply with specified quality standard for fit and clearance tolerances.

Adjust doors for smooth and balanced door movement.

Adjust closers for full closure.

Comply with specified quality standard for telegraphing, warp, and squareness.

Factory-Finished Doors: Do not field cut or trim; if fit or clearance is not correct, replace door.

Heat-Strengthened and Fully Tempered Glass: ASTM C1048.

Flush Wood Doors 08 14 16 - 3

E REQUIREMENTS

with work of other sections that is to be installed in or adjacent to the metal framing uding but not limited to structural anchors, cladding anchors, utilities, insulation, and

01 30 00 - Administrative Requirements for submittal procedures.

Provide data on standard framing members; describe materials and finish, product ations. Provide manufacturer's data on factory-made framing connectors, showing

CO Corporation: www.scafco.com.

steel Network, Inc: www.SteelNetwork.com.

manufacturer as metal framing.

on Strong Tie: www.strongtie.com.

nary and secondary framing members, bridging, bracing, plates, gussets, clips, fittings, nt, and fastenings as required to provide a complete framing system. irements: Provide completed framing system having the following characteristics:

Cold-Formed Metal Framing 05 40 00 - 1

Design: Calculate structural characteristics of cold-formed steel framing members according to AISI S100.

Structural Performance: Design, engineer, fabricate, and erect to withstand specified design loads for project conditions within required limits.

Design Loads: In accordance with applicable codes. As indicated on structural drawings. Live Load Defelection: In accordance with applicable codes. As indicated on structural

drawings unless noted otherwise .: Able to tolerate movement of components without damage, failure of joint seals, undue stress

on fasteners, or other detrimental effects when subject to seasonal or cyclic day/night temperature ranges.

Able to accommodate construction tolerances, deflection of building structural members, and clearances of intended openings.

FRAMING MATERIALS

Studs and Track: ASTM C955; studs formed to channel, C- or Sigma-shaped with punched web; U-shaped track in matching nominal width and compatible height.

Framing Connectors: Factory-made, formed steel sheet. Material: ASTM A653/A653M SS Grade 33 and 40 (minimum), with G90/Z275 hot dipped galvanized coating for base metal thickness less than 10 gauge, 0.1345 inch (3.42 mm), and factory punched holes and slots.

Structural Performance: Maintain load and movement capacity required by applicable code, when evaluated in accordance with AISI S100.

Fixed Connections: Provide non-movement connections for tie-down to foundation, floor-tofloor tie-down, roof-to-wall tie-down, joist hangers, gusset plates, and stiffeners.

ACCESSORIES

Bracing, Furring, Bridging: Formed sheet steel, thickness determined for conditions encountered; finish to match framing components. Shop and Touch-Up Primer: SSPC-Paint 15, complying with VOC limitations of authorities having

PART 3 EXECUTION

jurisdiction.

EXAMINATION

Verify that substrate surfaces are ready to receive work.

Verify field measurements and adjust installation as required.

Fasteners: Threaded steel.

ndard plastic grommets for cut-outs, in color to match adjacent surface.

A A156.9, types as recommended by fabricator for quality grade specified. Supports: Standard side-mounted system using recessed metal shelf standards es for pin supports and coordinated self rests, polished chrome finish, for nominal 1 acing adjustments. kets: Fixed, concealed vertical leg, side-of-stud mounting.

Steel L- and T-shapes.

or Pulls: "U" shaped wire pull, aluminum with satin finish, 4 inch centers ("U"

, aluminum with satin finish, 100 mm centers).

Keyed cylinder, two keys per lock, master keyed, steel with chrome finish. and Latches:

netic catch.

extension with overtravel.

Capacity: Heavy Duty grade.

Side mounted. Provide self closing/stay closed type.

an style concealed self-closing type, steel with polished finish.

s and methods of construction are to meet the requirements of Architectural Standards for the grade or grades specified.

C Remodel Phase 1

Architectural Wood Casework 06 41 00 - 3

Where locking drawers are indicated, provide dust panels above and below drawer. Assembly: Shop assemble cabinets for delivery to site in units easily handled and to permit passage through building openings.

Edging: Fit shelves, doors, and exposed edges with specified edging. Do not use more than one piece for any single length.

Plastic Laminate: Apply plastic laminate finish in full uninterrupted sheets consistent with manufactured sizes. Fit corners and joints nairline; secure with concealed fasteners. Slightly bever

arises. Provide cutouts for plumbing fixtures. Verify locations of cutouts from on-site dimensions. Prime paint cut edges.

PART 3 EXECUTION

EXAMINATION

Verify adequacy of backing and support framing.

Verify location and sizes of utility rough-in associated with work of this section. INSTALLATION

Install work in accordance with AWI/AWMAC/WI (AWS) or AWMAC/WI (NAAWS) requirements for

grade indicated. Set and secure custom cabinets in place, assuring that they are rigid, plumb, and level.

Use fixture attachments in concealed locations for wall mounted components.

Use concealed joint fasteners to align and secure adjoining cabinet units.

Carefully scribe casework abutting other components, with maximum gaps of 1/32 inch (0.79 mm).

Do not use additional overlay trim for this purpose. Secure cabinets to floor using appropriate angles and anchorages.

Countersink anchorage devices at exposed locations. Conceal with solid wood plugs of species to match surrounding wood; finish flush with surrounding surfaces.

ADJUSTING

Test installed work for rigidity and ability to support loads.

Adjust moving or operating parts to function smoothly and correctly.

CLEANING

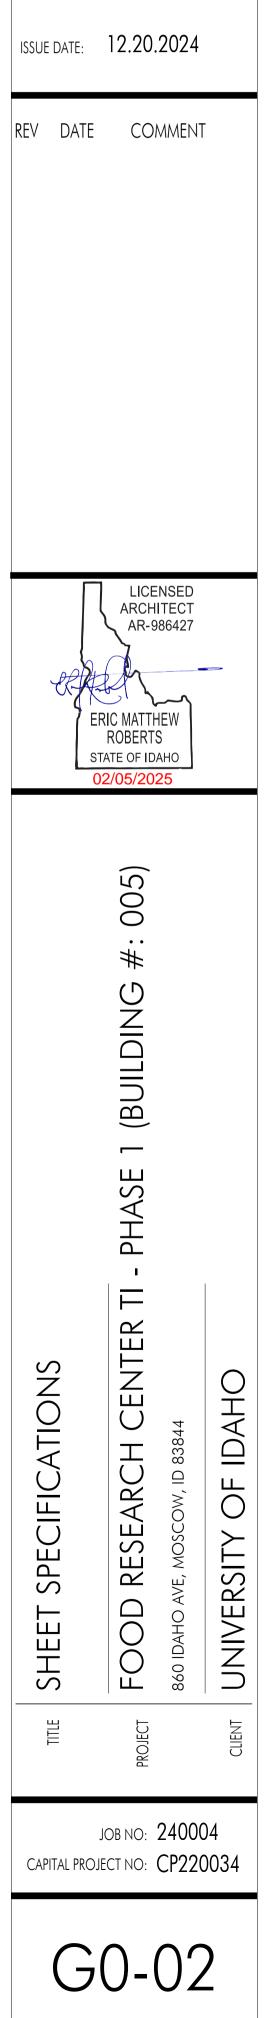

Clean casework, counters, shelves, hardware, fittings, and fixtures.

| COMMON WORK RESULTS FOR FLOORING PREPARATION |
|--|
| PART 1 GENERAL |
| SECTION INCLUDES |
| This section applies to floors identified in Contract Documents that are receiving the following types of floor coverings: |
| Resilient tile and sheet. |
| Carpet tile. |
| Removal of existing floor coverings. |
| Preparation of existing concrete floor slabs for installation of floor coverings. |
| Testing of concrete floor slabs for moisture and alkalinity (pH). |
| Testing of existing concrete floor slabs for moisture and alkalinity (pH) has already been conducted; test report is attached. |
| Remediation of concrete floor slabs due to unsatisfactory moisture or alkalinity (pH) conditions. |
| Contractor shall perform all specified remediation of concrete floor slabs. If such remediation is indicated by testing agency's report and is due to a condition not under Contractor's control or could not have been predicted by examination prior to entering into the contract, a contract modification will be issued. |
| Patching compound. |
| Remedial floor coatings. |
| Remedial floor sheet membrane. |
| ADMINISTRATIVE REQUIREMENTS |
| Coordinate scheduling of cleaning and testing, so that preliminary cleaning has been completed for at least 24 hours prior to testing. |
| SUBMITTALS |
| Visual Observation Report: For existing floor coverings to be removed. |

Floor Covering and Adhesive Manufacturers' Product Literature: For each specific combination of substrate, floor covering, and adhesive to be used; showing:

- Moisture and alkalinity (pH) limits and test methods.
- Manufacturer's required bond/compatibility test procedure.
- Testing Agency's Report:

Description of areas tested; include floor plans and photographs if helpful.

University of Idaho - FRC Remodel Phase 1 Common Work Results for Flooring Preparation 09 05 61 - 1 September 2024

ACOUSTICAL CEILINGS PART 1 GENERAL SECTION INCLUDES Acoustical units. ADMINISTRATIVE REQUIREMENTS Sequence work to ensure acoustical ceilings are not installed until building is enclosed, sufficient heat is provided, dust generating activities have terminated, and overhead work is completed, tested, and approved. Do not install acoustical units until after interior wet work is dry. SUBMITTALS See Section 01 30 00 - Administrative Requirements for submittal procedures. Product Data: Provide data on acoustical units. Samples: Submit two samples 4x4 inch (102x102 mm) in size illustrating material and finish of acoustical units. Maintenance Materials: Furnish the following for Owner's use in maintenance of project. See Section 01 60 00 - Product Requirements, for additional provisions. Extra Acoustical Units: Quantity equal to 5 percent of total installed. FIELD CONDITIONS Maintain uniform temperature of minimum 60 degrees F (16 degrees C), and maximum humidity of 40 percent prior to, during, and after acoustical unit installation. PART 2 PRODUCTS MANUFACTURERS Acoustic Tiles/Panels: Armstrong World Industries, Inc: www.armstrongceilings.com. CertainTeed Corporation: www.certainteed.com. USG Corporation: www.usg.com/ceilings. Or Equal. ACOUSTICAL UNITS Recycled Content: Minimum 10 percent post-consumer recycled content, or minimum [40] percent pre-consumer recycled content.

Product Data: Provide data on specified products, describing physical and performance characteristics; including sizes, patterns and colors available; and installation instructions. Verification Samples: Submit two samples, illustrating color and pattern for each resilient flooring product specified. Maintenance Data: Include maintenance procedures, recommended maintenance materials, and suggested schedule for cleaning, stripping, and re-waxing. Maintenance Materials: Furnish the following for Owner's use in maintenance of project. See Section 01 60 00 - Product Requirements, for additional provisions. | Mohawk Group: www.mohawkgroup.com. Minimum Requirements: Comply with ASTM F1913. Critical Radiant Flux (CRF): Minimum 0.45 watt per square centimeter, when tested in accordance with ASTM E 648, NFPA 253, ASTM E 648, or NFPA 253. Thickness: 0.080 inch (2.0 mm) nominal. Average Weight: 5.3 lbs/sq. yd. (2.8 Kg/sq. m.). Sheet Width: 78 inch (1981 mm) minimum. Static Load Resistance: 250 psi (1725 kPa) minimum, when tested as specified in ASTM F970. Seams: Heat welded. Integral coved base with cap strip. Color: As indicated on drawings. Welding Rod: Solid bead in material compatible with flooring, produced by flooring manufacturer for heat welding seams, and in color matching field color. RESILIENT BASE Resilient Base: ASTM F1861, Type TS rubber vulcanized thermoset; top set style based on flooring type as recommended by manufacturer. | Subfloor Filler: White premix latex; type recommended by adhesive material manufacturer Primers, Adhesives, and Seam Sealer: Waterproof; types recommended by flooring manu Moldings, Transition and Edge Strips: Same material as flooring. Filler for Coved Base: Plastic. PART 3 EXECUTION EXAMINATION Verify that surfaces are flat to tolerances acceptable to flooring manufacturer, free of crack might telegraph through flooring, clean, dry, and free of curing compounds, surface harden other chemicals that might interfere with bonding of flooring to substrate. Cementitious Subfloor Surfaces: Verify that substrates are ready for resilient flooring insta testing for moisture and alkalinity (pH). Obtain instructions if test results are not within limits recommended by resilient floorin manufacturer and adhesive materials manufacturer. PREPARATION Remove existing resilient flooring and flooring adhesives; follow the recommendations of R (RWP). Prepare floor substrates as recommended by flooring and adhesive manufacturers. Remove subfloor ridges and bumps. Fill minor low spots, cracks, joints, holes, and other of |
| September 2024 09 05 61 - 2 Acoustical Tiles: Painted mineral fiber, with the following characteristics: Classification: ASTM E1264 Class A. Size: 24 by 48 inch (610 by 1219 mm). Thickness: 3/4 inch (19 mm). Light Reflectance: 79 percent, determined in accordance with ASTM E1477. NRC: 0.55, determined in accordance with ASTM C423. Extra Vall Base: 30 linear feet (9.14 linear meters) of each type and color. DELVERY, STORAGE, AND HANDLING Store all materials off of the floor in an acclimatized, weather-tight space. Protect roll materials off of the floor in an acclimatized, weather-tight space. FIELD CONDITIONS | Mohawk Group: www.mohawkgroup.com. Minimum Requirements: Comply with ASTM F1913. Critical Radiant Flux (CRF): Minimum 0.45 watt per square centimeter, when tested in accordance with ASTM E 648, NFPA 253, ASTM E 648, or NFPA 253. Thickness: 0.080 inch (2.0 mm) nominal. Average Weight: 5.3 lbs/sq. yd. (2.8 Kg/sq. m.). Sheet Width: 78 inch (1981 mm) minimum. Static Load Resistance: 250 psi (1725 kPa) minimum, when tested as specified in ASTM F970. Seams: Heat welded. Integral coved base with cap strip. Color: As indicated on drawings. Welding Rod: Solid bead in material compatible with flooring, produced by flooring manufacturer for heat welding seams, and in color matching field color. RESILIENT BASE Resilient Base: ASTM F1861, Type TS rubber vulcanized thermoset; top set style based on flooring type as recommended by manufacturer. Manufacturers: Johnsonite, a Tarkett Company: www.johnsonite.com Mannington Commercial: www.manningtoncommercial.com Roppe Corporation; Contours Profiled Wall Base System: www.roppe.com. Or Equal. Height: 4 inch (100 mm) and 4.625 inch (117.5 mm). | Subfloor Filler: White premix latex; type recommended by adhesive material manufacturer Primers, Adhesives, and Seam Sealer: Waterproof; types recommended by flooring manu Moldings, Transition and Edge Strips: Same material as flooring. Filler for Coved Base: Plastic. PART 3 EXECUTION EXAMINATION Verify that surfaces are flat to tolerances acceptable to flooring manufacturer, free of crack might telegraph through flooring, clean, dry, and free of curing compounds, surface harder other chemicals that might interfere with bonding of flooring to substrate. Cementitious Subfloor Surfaces: Verify that substrates are ready for resilient flooring insta testing for moisture and alkalinity (pH). Obtain instructions if test results are not within limits recommended by resilient flooring manufacturer and adhesive materials manufacturer. PREPARATION Remove existing resilient flooring and flooring adhesives; follow the recommendations of F (RWP). Prepare floor substrates as recommended by flooring and adhesive manufacturers. Remove subfloor filler to achieve smooth, flat, hard surface. Prohibit traffic until filler is fully cured. Installation - General Starting installation constitutes acceptance of subfloor conditions. Install in accordance with manufacturer's written instructions. |
| ippetember 2024 09 05 61 - 2 Acoustical Tiles: Painted mineral fiber, with the following characteristics: Classification: ASTM E1284 Class A. Size: 24 by 48 inch (610 by 1219 mm). Size: 24 by 48 inch (610 by 1219 mm). Thickness: 3/4 inch (19 mm). Light Reflectance: 79 percent, determined in accordance with ASTM E1477. NRC: 0.55, determined in accordance with ASTM C423. | | PART 2 PRODUCTS | PART 3 EXECUTION |
|---|--|--|
| PART 1 GENERAL | MANUFACTURERS | EXAMINATION |
| PART 1 GENERAL SECTION INCLUDES Carpet tile, fully adhered. SUBMITTALS Product Data: Provide data on specified products, describing physical and performance characteristics; sizes, patterns, colors available, and method of installation. Recycled Content: Indicate recycled content; indicate percentage of pre-consumer and post-consumer recycled content per unit of product. If recycled content product is part of an assembly, indicate the percentage of recycled content product in the assembly by weight. Salvaged/Refurbished: Indicate percentage of salvaged/refurbished content per unit of product. VOC data: Adhesives: Submit manufacturer's product data for adhesives. Indicate VOC limits of the product. Submit MSDS highlighting VOC limits. Samples: Submit two carpet tiles illustrating color and pattern design for each carpet color selected. Operation and Maintenance Data: Include maintenance procedures, recommended maintenance materials, and suggested schedule for cleaning. Maintenance Materials: Furnish the following for Owner's use in maintenance of project. See Section 01 60 00 - Product Requirements, for additional provisions. Extra Carpet Tiles: Quantity equal to 5 percent of total installed of each color and pattern | MANUFACTURERS File Carpeting: Tarkett: www.commercial.tarkett.com. Mohawk Group: www.mohawkgroup.com. Shaw: www.shaw.com. Or Equal. Tile Carpeting: Patterned Loop, manufactured in one color dye lot. Tile Size: 18 x 36 inch, nominal. Critical Radiant Flux: Minimum of 0.45 watts/sq cm, when tested in accordance with ASTM E648 or NFPA 253. Surface Flammability Ignition: Pass ASTM D2859 (the "pill test"). Maximum Electrostatic Charge: 3 Kv. at 20 percent relative humidity. Gage: 5/64 inch. Stitches: 9.8 per inch. Pile Weight: 14 oz/sq yd (474.6 gm/sq m). Primary Backing Material: 100% synthetic. ACCESSOREE Subfloor Filler: White premix latex; type recommended by flooring material manufacturer. Edge Strips: Embossed aluminum, color as selected by Architect. Adhesives: | EXAMINATION Verify that subfloor surfaces are smooth and flat within tolerances specified for that type of work and are ready to receive carpet tile. Verify that subfloor surfaces are dust-free and free of substances that could impair bonding of adhesive materials to subfloor surfaces. Cementitious Subfloor Surfaces: Verify that substrates are ready for flooring installation by testing for moisture and alkalinity (pH). Obtain instructions if test results are not within limits recommended by flooring material manufacturer and adhesive materials manufacturer. PREPARATION Prepare floor substrates as recommended by flooring and adhesive manufacturers. Remove subfloor ridges and bumps. Fill minor or local low spots, cracks, joints, holes, and other defects with subfloor filler. Apply, trowel, and float filler to achieve smooth, flat, hard surface. Prohibit traffic until filler is cured. Vacuum clean substrate. INSTALLATION Starting installation constitutes acceptance of subfloor conditions. Instal carpet tile in accordance with manufacturer's instructions. Instal carpet tile in accordance with manufacturer's instructions. Lay carpet tile clean. Fit carpet tight to intersection with vertical surfaces without gaps. Lay carpet tile in ashlar pattern, with pile direction parallel to next unit, set parallel to building lines. Fully adhere carpet tile to substrate. Trim carpet tile neatly at walls and around interruptions. </td |
| installed. WEAR WARRANTY | Compatible with materials being adhered; maximum VOC content of 50 g/L; CRI (GLP) certified; in lieu of labeled product, independent test report showing compliance is acceptable. | Complete installation of edge strips, concealing exposed edges. |
| Ten-Year Commercial Warranty against excessive wear, delamination, edge ravel, zippering, resiliency loss, and static. | Carpet Tile Adhesive: Recommended by carpet tile manufacturer; releasable type. | INDOOR AIR QUALITY Temporary ventilation: Provide temporary ventilation as specified in Section 01 57 21 - Indoor Air Quality Controls, and as follows: |
| FIELD CONDITIONS Store materials in area of installation for minimum period of 24 hours prior to installation. | | Ventilate products prior to installation. Remove from packaging and ventilate in a secure, dry, well-ventilated space free from strong contaminant sources and residues. Provide a temperature range of 60 degrees F minimum to 90 degree F maximum continuously for minimum 72 hours. |
| | | |

Tile Carpeting 09 68 13 - 1

University of Idaho - FRC Remodel Phase 1 September 2024

Immediately after installation, clean carpet thoroughly with a high-efficiency particulate air (HEPA) filtration vacuum or certified CRI Green Label vacuum cleaner.

WASTE MANAGMENT

As specified in Section 01 7419 - Construction Waste Management and Disposal. Coordinate with manufacturer for take-back program. Set aside scrap to be returned to

manufacturer for recycling into new product. CLEANING

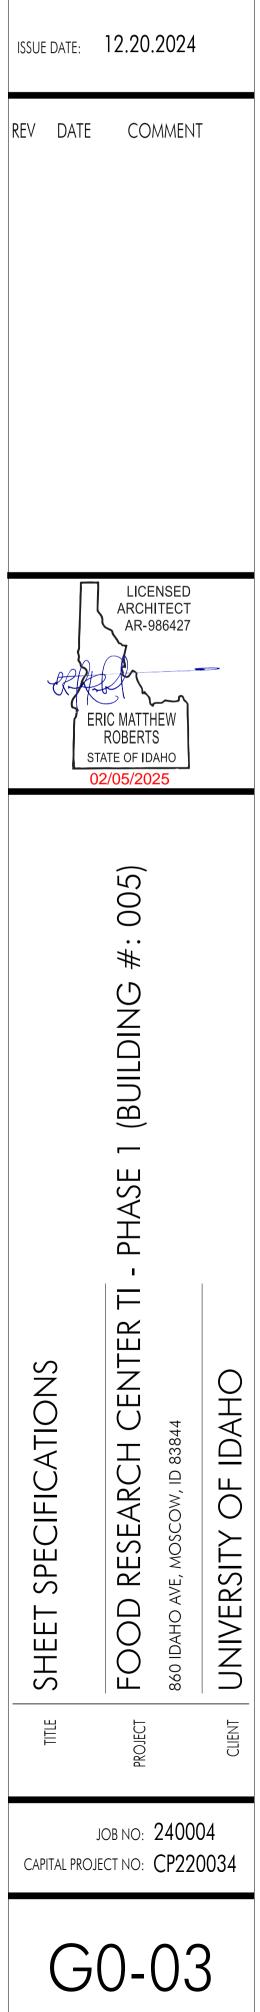

Remove excess adhesive without damage, from floor, base, and wall surfaces. Clean and vacuum carpet surfaces.

Prepare all cutouts accurately to size; replace tops having improperly dimensioned or unnecessary cutouts or fixture holes. Provide back/end splash wherever counter edge abuts vertical surface unless otherwise indicated Secure to countertop with concealed fasteners and with contact surfaces set in waterproof glue. Height: 4 inches (102 mm), unless otherwise indicated. Solid Surfacing: Fabricate tops and wall panels up to 96 inches (2438 mm) long in one piece; join pieces with adhesive sealant in accordance with manufacturer's recommendations and instruction Wall-Mounted Counters: Provide skirts, aprons, brackets, and braces as indicated on drawings, finished to match. PART 3 EXECUTION EXAMINATION Do not begin installation until substrates have been properly prepared. If substrate preparation is the responsibility of another installer, notify Architect of unsatisfactory preparation before proceeding. Verify that wall surfaces have been finished and mechanical and electrical services and outlets are installed in proper locations. INSTALLATION Securely attach countertops to cabinets using concealed fasteners. Make flat surfaces level; shirr where required. Attach epoxy resin countertops using compatible adhesive. See al joint between back/end splashes and vertical surfaces. |

GENERAL NOTES

- A. TYPICAL NON-LOAD BEARING PARTITION TYPES REFLECT DESIGN INTENT, CONFIGURATIONS, TERMINATION AND PROFILES OF WALLS.
- B. WALL FINISHES ARE NOT SHOWN AND SPECIFIED ELSEWHERE.
- C. WALL FRAMING MEMBERS ARE MINIMUMS UNLESS LARGER MEMBERS ARE REQUIRED DUE TO HEIGHT AND SPAN LIMITATIONS. REFER TO TYPICAL NON-LOAD BEARING WALL DETAILS.
- D. WALL FRAMING SPACING ARE MINIMUMS UNLESS LARGER MEMBERS ARE REQUIRED DUE TO HEIGHT AND SPAN LIMITATION. REFER TO TYPICAL NON-LOAD BEARING WALL DETAILS.
- E. BLOCKING OR BACKING PLATES SHALL BE PROVIDED TO SUPPORT ALL PRODUCTS ATTACHED TO WALLS AFTER COMPLETION OF FINISH SURFACE, INCLUDING BUT NOT LIMITED TO TOILET AND BATH ACCESSORIES, PLUMBING AND ELECTRICAL FIXTURES, CASEWORK, HANDRAILS, EQUIPMENT AND FURNISHINGS.
- F. MOLD RESISTANT GYPSUM BOARD (GLASS MAT FACED OR MOLD RESISTANT PAPER FACED PRODUCTS) IS REQUIRED AT PLUMBING WALLS AND WET LOCATIONS SUCH AS TOILET ROOMS, UTILITY ROOMS, JANITOR ROOMS, AND OTHER WET LOCATIONS.
- G. MOLD RESISTANT GYPSUM BOARD (GLASS MAT FACED OR MOLD RESISTANT PAPER FACED PRODUCTS) IS REQUIRED WHENEVER BOARD IS BEING INSTALLED BEFORE THE BUILDING IS ENCLOSED AND CONDITIONED.
- H. TILE BACKING BOARD FOR WET AREAS SHALL BE GLASS MAT FACED BOARD UNLESS NOTED OTHERWISE.
- I. TILE BACKING BOARD FOR NON WET AREAS SHALL BE WATER RESISTANT GYPSUM BACKING BOARD.
- J. ALL TOP OF FULL HEIGHT WALLS SHALL ACCOMMODATE A MINIUM OF 1/2" DEFLECTION. K. ALL PARTIAL HEIGHT WALLS SHALL BE BRACED TO RESIST LATERAL LOADS IN
- ACCORDANCE WITH CODE. REFER TO TYPICAL NON-LOAD BEARING WALL DETAILS.
- L. ALL LOW WALLS SHALL BE BRACED OR STIFFENED INTERNALLY. REFER TO TYPICAL NON-LOAD BEARING WALL DETAILS.
- M. ALL FIRE RATED ASSEMBLIES SHALL BE CONSTRUITED IN ACCORDANCE WITH THEIR LISTED ASSEMBLIES.
- N. ALL SOUND RATED ASSEMBLIES SHALL BE CONSTRUCTED IN ACCORDANCE WITH THEIR LISTED ASSEMBLIES.
- O. ALL PENETRATION THROUGH FIRE RATED ASSEMBLIES SHALL BE FIRE STOPPED IN ACCORDANCE WITH FIRE LIFE SAFETY DRAWINGS AND THEIR LISTED ASSEMBLIES. P. ALL FIRE RESISTIVE JOINTS IN WALL INCLUDING BUT NOT LIMITED TO HEAD OF WALL AND WALL TO FLOOR SHALL BE CONSTRUCTED IN ACCORDANCE WITH THEIR LISTING. REFER
- TO FIRE LIFE SAFETY DRAWINGS FOR LISTED ASSEMBLIES. Q. ALL SHAFT WALLS SHALL BE PROVIDE WITH ACOUSTIC ATTENUATION, SOUND BATT INSULATION.

LEVEL 2 FURNITURE & EQUIPMENT PLAN (FOR REFERENCE ONLY)

KEYNOTES

| 1-01 | INSTALL NEW DUCTLESS BIO SAFETY CABINET WITH HEPA EXHAUST FILTER. |
|------|---|
| 1-02 | NEW SINK WITH NEW PLUMBING, CONNECT TO EXISTING DI SYSTEM. REFER TO PLUMBNG DRAWINGS. |
| 1-03 | NEW STAINLESS STEEL SINK AND FAUCET CONNECTED TO EXISTING PLUMBING. |
| 1-04 | FREE STANDING -80 DEGREE CELSIUS FREEZER WITH LN2 BACKUP SYSTEM, OF/OI |
| 1-05 | FREE STANDING -20 DEGREE CELSIUS FREEZER, OF/OI. |
| 1-06 | FREE STANDING 4 DEGREE CELSIUS REFRIGERATOR, OF/OI. |
| 1-09 | WALL MOUNTED NANOPURE WATER PURIFICATION SYSTEM. |
| 1-10 | NEW COUNTER AND CASEWORK TO INCLUDE ADDITIONAL POWER TO SUPPORT ALL PROGRAM SPECIFIC LABORATORY EQUIPMENT. |
| 1-12 | NEW SYSTEM FURNITURE WORK/COMPUTER STATIONS, OF/OI. |
| 1-13 | NEW BUILT IN CASEWORK WITH CABINETS ABOVE. |
| 1-14 | MBAC (BIA) BODY COMPOSITION ANALYZER, OF/OI. |
| 1-15 | ULTRASOUND, OF/OI. |
| 1-16 | EXAM TABLE, OF/OI. |
| 1-17 | SCALE AND HEIGHT BOARD, OF/OI. |
| 1-18 | BLOOD DRAW CHAIR, OF/OI. |
| 1-19 | STACKABLE WASHER/DRYER, OF/OI. |
| 1-20 | STORAGE LOCKERS FOR PARTICIPANTS, CF/CI. |
| 1-21 | WORK TABLE, OF/OI. |
| 1-22 | END TABLE, OF/OI. |
| 1-23 | DRESSING ROOM CURTAIN. SEE RCP FOR CURTAIN TRACK. |
| 1-24 | LOBBY SEATING, OF/OI. |
| 1-32 | NEW BUILT IN CASEWORK. |
| 1-33 | BODPOD, OF/OI. |
| 1-34 | HORIZON DXA SYSTEM, OF/OI. |
| 1-35 | BOOK SHELF, OF/OI. |
| 1-36 | CO2 SUPPLY TANK (WALL MOUNT), OF/OI. |
| 1-40 | METABOLIC MONITOR, OF/OI. |
