Description of Work Accomplished During the Month The project team continued working on the data collection and analysis for the project. The data include both detector input data and as well as video recording of the intersection operations. The data is being collected for detectors at the stop-bar for both through and left-turn movements as well as at advance location upstream from the stop bar. The data is being collected for nine different detection systems at the stop bar location and for seven different systems at the advance detection location. An initial report documenting the detection accuracy of each of the systems will be shared with each vendor during the first week of March. Vendors will be given the option of making adjustment to the configuration of their system before the final testing begins.
