Skills

# Identifying Idaho's Trees

Because we have such a varied range of geography, soils, and precipitation patterns, Idaho has a wider variety of native trees than most other Rocky Mountain states. The first step in caring for these trees, whether they be in a landscape or in a forest, is correct species identification.

Distinguishing between Idaho's trees can be a daunting task for beginners. Through a combination of images and live samples, *Identifying Idaho's Trees* will help participants quickly identify Idaho's most common native trees, including:

- lodgepole pine
- ponderosa pine
- western white pine
- western larch
- Douglas-fir
- Engelmann spruce
- grand fir

- subalpine fir
- western redcedar
- western hemlock
- pacific yew
- black cottonwood
- quaking aspen
- red alder

*Identifying Idaho's Trees* is being held in conjunction with UI Master Gardeners and will be held at the following dates and locations:

## Sandpoint

Thursday, February 13, 2025 (9am to 12pm)  
UI Sandpoint Organic Agriculture Center  
10881 N Boyer Road

## St. Maries

Thursday, March 13, 2025 (1-3pm)  
Community Presbyterian Church  
100 College Ave

## Coeur d'Alene

Saturday, April 26, 2025 (10am to 1pm)  
Idaho Dept. of Fish and Game Meeting Room  
2885 W. Kathleen Ave

To ensure an effective learning environment, each session is limited to 40 participants. Please register (see registration details on the back of this flyer) as soon as possible to assure your place and help us plan. A \$10 registration fee includes handouts and refreshments. For registration questions, contact the University of Idaho Extension Office listed for the program you wish to attend.
